
BUCK BARRIER

Buck Barrier is a plant-based foliar repellent designed to protect soybeans and corn from costly deer browsing. Built for growers who battle heavy wildlife pressure, Buck Barrier works quickly- often within 24–48 hours -to dramatically reduce feeding damage. Its non-toxic formula is safe for humans, pets, and pollinators, while helping plants recover from early-season grazing and regain growth momentum.

Key Benefits

- Rapid, proven deer repellency — noticeable reduction in feeding within 24–48 hours
- Plant-based and non-toxic, safe for humans, pets, and pollinators
- Supports plant recovery after early-season browsing to rebuild growth momentum
- Easily integrates into foliar programs and can be broadcast with soil applications
- Backed by real growers & agronomists, with strong field-proven performance
