
TRIVITA

PGR Bio-stimulant liquid

Trivita is a fortified cytokinin designed to increase pollination and support photosynthesis during fruit or grain fill. The unique combination produces more flowering/fruiting sites, and more importantly increases the plant's net capture of solar energy to help drive sugar production.

Increases Flowering/Fruiting Sites

- Kinetin drives cell differentiation
- More branches, more flowers
- More reproductive sites

Enhances Plant Photosynthesis

- Choline Chloride (CC) and GABA capture and transfer sun energy
- Build protein and membranes

Produces Larger Yields

- Stronger pollination
- Less abortion
- Higher test weights

EVOLVE CROP SYSTEMS

TriVita

A plant growth regulator for enhancing shoot and root growth, photosynthesis, abiotic stress resistance, mineral uptake, and production of listed crops

ACTIVE INGREDIENTS:	**By Wt.**
Cytokinin (as kinetin):	0.12%
Gamma Aminobutyric Acid (GABA):	1.00%
Choline Chloride:	2.00%
OTHER INGREDIENTS:	96.88%
TOTAL:	100.00%

KEEP OUT OF REACH OF CHILDREN

CAUTION

See (back) (side) panel for additional Precautionary Statements and Directions for Use

FIRST AID	
If in eyes:	• Hold eye open and rinse slowly and gently with water for 15 to 20 minutes • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye • Call a poison control center or doctor for treatment advice

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For non-emergency information concerning this product, call the National Pesticide Information Center (NPIC) at 1-800-858-7378 (NPIC Web site: www.npic.orst.edu).
For general product information, call CH Biotech, LLC at (909) 472-3033 between the hours of 9 a.m. – 4 p.m. Pacific Time.
