

CO CARBON 22

Eco - Carbon 22 is a humic and fulvic acid soil amendment designed to improve nutrient efficiency, root development, soil structure, and water management. By supporting nutrient availability and beneficial soil biology, it helps promote healthier crops and stronger performance under stressful growing conditions.

Key Benefits

- Improves nutrient availability and uptake efficiency
- Helps increase cation exchange capacity (CEC) and reduce nutrient leaching
- Supports beneficial soil microorganisms and nutrient cycling
- Promotes stronger root development and improved plant vigor
- Helps crops tolerate drought, salinity, and temperature stress
- Improves soil water retention, infiltration, and drainage
