

## SWEET FULVIC

### Product Information

Sweet Fulvic is the newest addition to our EVOLVE family—engineered as a high-performance plant health enhancer and supplemental energy source. This innovative blend combines the carbon-rich benefits of Sweet Success® with the fulvic-powered mobility of Fulvic Force, delivering a versatile, all-in-one solution for healthier, more productive crops.

With the systemic efficiency of EVOLVE technology, Sweet Fulvic penetrates leaf surfaces rapidly, boosts Brix levels, and provides essential carbon sources to support plant growth, development, and stress tolerance.

### Use Cases

- Herbicide tank mixes
- Fungicide applications
- Foliar nutrient programs
- Biologicals
- In-season plant health passes

### Key Benefits

- Boosts Brix levels to support plant health, vigor, and nutrient density.
- Provides diverse carbon sources for improved growth and development.
- Acts as a penetrating surfactant, improving leaf absorption and spray performance.
- Functions as a drift control agent when mixed with herbicides and fungicides.
- Enhances adhesion (“sticking action”) for longer leaf surface contact.
- Safe for biologicals, maintaining compatibility with living microbial products.

### Application Rate

Broadcast:

20 – 64 oz per acre

Use higher rates for tougher conditions, dense canopies, or when increased adhesion and penetration are desired.
